## ANTIRRHINUM RUST PROOF

We give all credit to the University of California and especially Professor Emsweller for producing RUST PROOF SNAPS. We at one time thought this a hopeless task, but it is now a reality. However, as there is still much work to be done, we recommend the following varieties and mixtures for bedding and home garden work only, with about 75% of the plants coming rust proof. We are offering the better varieties.

## STOCKS (Gilliflower)

AWARDS Received at the 1932 R. H. S. STOCK TRIALS held at WISLEY, ENGLAND.

We received THREE AWARDS OF MERIT and NINE HIGHLY COMMENDED for our cultures of Bismark, Beauty of Nice, and Perpetual Branching Stocks at the 1932 stock trials conducted by The Royal Horticultural Society of Great Britain after trial at Wisley, England.

## \*STOCK GIANTS OF CALIFORNIA

This magnificent group comes very early having the branching habit of the Bismark, with mammoth flowers on longer stems; on this account it is a great improvement over all forcing stocks. We can with confidence recommend it to the florist grower; its branching habit lends itself admirably for bedding work and it comes with a high percentage of double plants, thirty-four inches tall.
